Ms. Nancy Katlin
Broadridge Hiring Manager
New York City, NY 38492

Dear Hiring Manager Katlin:

I am writing to express my keen interest in the Senior Software Engineer Full-stack position advertised on <https://www.themuse.com>. As a student at Brigham Young University IDAHO majoring in computer science with a keen interest in software development and a strong foundation in the technologies listed in the job description. Broadridge Workplace is grounded in the concept of FACS: Flexible, Accountable, Connected, and Supported, which is its commitment to support clients and the communities. I also share this trademark and I am confident that I possess the necessary skills and qualifications to be a vital asset to your software development team.

In my previous role as a Full-stack Developer at Don Bosco University, I was responsible for the entire development lifecycle of web applications, from translating design team's UX wireframes and mockups into responsive, interactive features using HTML/CSS and JavaScript, to collaborating with customers and other developers to determine project needs and technical concerns. I have extensive experience with front-end development using jQuery, AJAX, Bootstrap, React Js, and I am proficient in back-end development using .Net/C#, Python (Django, and Flask) and SQL Server.

I am a highly motivated and results-oriented individual with a passion for software development. I am a quick learner and I am confident that I can quickly adapt to your company's development environment and coding standards. I am also a team player and I am confident that I can work effectively with other developers and stakeholders to deliver high-quality software on time and within budget.

Through these experiences, along with my coursework in software engineering, I am confident I am able to navigate the challenges of the Broadridge internship program. I look forward to the opportunity to speak with you about my qualifications. Thank you for your consideration.

Sincerely,

Marcel Nyembo Musuyu
